

B.VEO TRACK

TRACK LIGHT

With B.VEO TRACK the product family is complete. What is special about this single spotlight variant is its extremely narrow housing that visually almost fuses with the power track. In that way a very uncluttered pattern of the ceiling lighting is obtained. This becomes possible through the integration of the driver into the adapter.

Subdued look

Uncluttered ceiling pattern due to extremely flat housing, spotlight with pinpoint accuracy.

Economical mounting

Fast, tool-free, inexpensive due to use of existing 3-current power tracks

Flexible illumination

Accents set easily: spotlight head turning through 355° and tilting through 90°

Strong directional spotlight

Maximum power by up to 4000 lumens in the mini spotlight

Intelligent light

Smart lighting management optionally with control line or wireless
